

Data Flow Diagram

Date	29 June 2026
Team ID	XXXX
Project Name	Opticrop: Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Data Flow Diagram

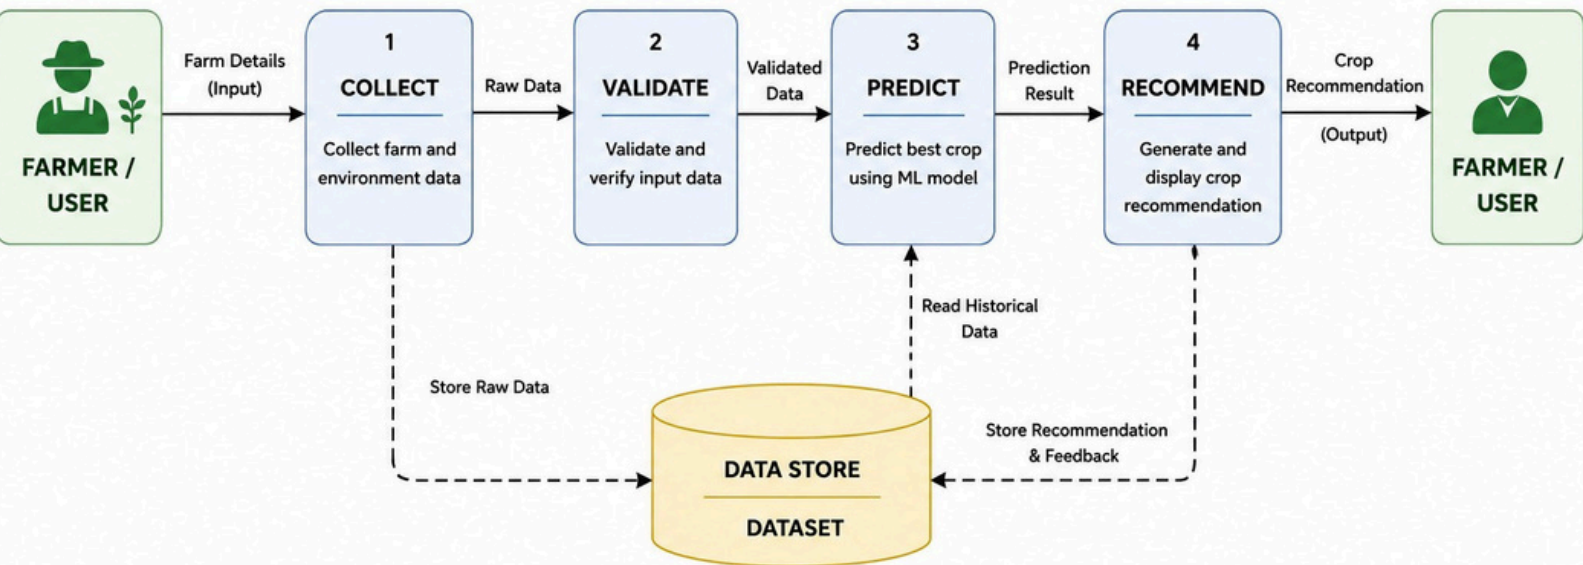

The DFD helps visualize the overall movement of data within the system and shows how each process contributes to making an accurate and efficient credit card approval decision.

Data Flow Table

Component	Description
External Entity 1	Farmer
External Entity 2	Agricultural Expert
Process 1	Collect farm data
Process 2	Validate Input Data
Process 3	Predict the best crop
Process 4	Display crop recommendation
Data Store	Crop Dataset
Input Data	Soil Data
Output Data	Prediction of crop

DATA FLOW DIAGRAM (DFD) – OPTICROP

Smart Agricultural Production Optimization Engine

DFD COMPONENTS

-  External Entity
-  Process
-  Data Store
-  Data Flow

DATA FLOW SUMMARY

Input Data : Farm Data
Data Store : Dataset
Output Data : Recommendation

DESCRIPTION

The system collects farm and environmental data from the user, validates it, predicts the best crop using machine learning models trained on historical data, and provides crop recommendations to improve productivity and profitability.
